## **CACI & Laser skin-tightening treatments at Henley Clinic**

**Henley Life investigates the non-invasive treatment course of bespoke facials - CACI muscle-tightening with Laser skin-tightening treatments at Henley Clinic. Our reviewer wanted her sagging late-forties skin to spring back to life. She was looking for real, lasting results to see her through the summer season's events.**

Henley Clinic offer free beauty consultations, during which they'll devise a bespoke approach to suit your specific needs.

After a discussion about what was on offer, the consultant suggested to our beauty reviewer a five-week course of Caci & Laser skin-tightening treatments.

CACI is a brand that is trusted and has built a reputation over the past two decades. It was introduced by Dr Thomas Wing as a treatment for Bell's palsy and stroke victims.

Nowadays celebrities like Jennifer Lopez and Lisa Snowdon praise the system as a brilliant way to iron out fine lines and keep muscles toned.

### **I saw an instant lift effect and had so many compliments**

Despite all the accolades, the reviewer remained a little apprehensive as she'd never tried Caci before and the promise of genuine lifting and tightening seemed too good to be true.

Also making a time commitment in the era of instant gratification was a consideration.

"I guess the believing is in the trying and having completed a five week course of 10 treatments, I can report that it really does work," she told us.

She was impressed with the depth of knowledge from the friendly team of Henley Clinic experts. They have regular clients that have been visiting the same therapist for over 20 years.

The Caci machine uses probes, which deliver a mild micro-

current. These probes gently stroke the skin in particular sequences to tone and shrink muscles that have been stretched; also lengthening the ones that have been shortened.

"The process was comfortable and what felt like scratching on the first few sessions became like an enjoyable facial muscle work out," said our reviewer.

"I liked to think that sleepy muscles were being woken-up and re-educated. Compared to the investment involved with other beauty treatments, the cost for a course of Caci's is incredible value.

"Any doubts on results were quashed after the very first session. I saw an instant lift effect and had so many compliments. After the second week I was completely hooked.

### **It has now become an essential part of my beauty regime**

"A course of 10 to 20 treatments are usually recommended. I'll be going back to The Henley Clinic every two to three months for maintenance.

"It's now become an essential part of my beauty regime and I highly recommend it."
